The duration of the first shock was about thirty seconds. This was followed half an hour later by a second shock almost as severe as the first.

U. S. TO RAISE PAY AT INDIAN HEAD, MD.

Employes at Naval Proving Ground to Get Average Increase of 7.2 Per Cent.

1,272 NAVY YARD WORKERS TO SUFFER A REDUCTION

Change in Wages Is Made Neces sary by an Act of Congress-Secretary Daniels Explains.

Exactly 1,272 employes of the Washngton navy yard out of about 2,500 will have their wages reduced 8 cents a day, beginning July 1, in order to give increase averaging 7.2 per cent to 900 employes at the naval proving grounds at Indian Head, Md. An increase in wages amounting to \$240,000 annually was voted by Congress two years ago for employes at both places But no representative of the Indian Head employes was on the board which recommended the increase on account of the higher cost of living, and the increase for those employes was not nade effective heretofore.

The noval appropriation act of the recent Congress made it mandatory that the Indian Head employes share in the distribution of the additional funds, and distribution of the additional funds, and Secretary Daniels today said he has no discretion in the matter. The wages at the Washington yard and at the Indian Head station are higher than at other naval stations, due, it is explained, to the higher grade of skill required in the making of guns at the local yard and to the manufacture of local yard and to the manufacture of powder at Indian Head.

Mr. Daniels' Explanation.

Secretary Daniels made the following statement in explanation of his action "Beginning July 1, a change will be nade in the wage schedules at the Washington navy yard and naval provtransformed the valley from a desert to a fertile farming country.

Capture of Labyrinth.

PARIS, June 23.—The fighting from May 30 to June 19, resulting in the conquest by the French of the system of works and trenches which the soldiers call "the labyrinth," is described today in a dispatch from an official observer at the front. The labyrinth, lying between Neuville, St. Vaast and Ecurie, formed a salient of the German line, and its position, a strong one, was greatly reinforced from time to time.

"French attacks on May 9 and days thereafter failed to modify the structure of the structure o and its position, a strong one, was greatly reinforced from time to time. Necessary Operations.

"This meant an operation of two rincipal phases, of different nature It was necessary, first, by well prepared and vigorous assaults, to get a footing in the enemy organization, and then to progress to the interior of the communication trenches in repulsing the enemy step by step. These two operations lasted more than three weeks and resulted in complete sucess.
"The debouch must have been diffi-

They were stationed at Givenchy, at La Folie, at Thelus. Farbus and Breauraine, south of Arras. Nevertheless our men understood and prepared to do their duty. It was May 30 that the assaults began, our regiments marching out from different points. Their ardor was admirable.

First Line Captured.

"Everywhere except on the right we were a great number of barricades and fortlets. We took some of these, while others stopped us. One hundred and fifty prisoners, surprised in their holes by the furious charge of the French infantry, fell into our hands.

Evening of June 19.

LONDON, June 23.-Substantial sucess has been achieved by the allied forces operating against the Turkish forces on the Gallipoli peninsula, according to an official statement from the headquarters of the Mediterranear expeditionary force. It says:

"After twenty-four hours of heavy and continuous fighting sustained success has been achieved. As already reported, the battle of June 4 and 5 resulted in a good advance of the center to which neither the right nor the left was able to conform, the reason being that the Turkish positions on the frontage flanks are naturally strong and exceedingly well fortified.

The Galician capital fell before the advance of the second army.

Held by Enemy Ten Months.

Lemberg, capital of Galicia, was occupied by the Russians September 2, 1914, about one month after the outreak of hostilities, in the course of the early Russian drive into Austria. It has therefore been in Russian control for over ten months.

For the past twenty days, since the Austro-Germans took Przemysl from the forces of Emperor Nicholas, it has been the objective of a series of flerce and concentrated attacks on the part of the Teutonic allies. Their success will have a far-reaching political effect, as the driving out of the Russians from Galicia is counted upon in Berlin to help maintain the status que in the Balkans.

One of Earliest Successes,

The capture of Lemberg was one of the earliest important successes of the Russians. Following it they pushed nward rapidly through Galicia. The high-water mark of the invasion found almost all the province in their hands. They approached within striking distance of Cracow, at the western end of the province close to the German passes of the Carpathian mountains. which separate Galicia from Hungary; and to the east swept down through the crown land of Bukowina to the
